State Treasurer and Board Chair's Message to Participants (Unaudited)

Dear Participant:

On behalf of the State of Delaware and the Plans Management Board, we are pleased to provide you with your DE529 Education Savings Plan ("the Plan") annual report as of December 31, 2022. The annual report is designed to provide you with an opportunity to review the Plan in depth, including the performance of the portfolios, along with expense, holdings, asset allocation and investment strategy information. Additionally, the *Management's Discussion of Fund Performance* provides commentary from the Plan's Co-Portfolio Managers, Andrew Dierdorf, Brett Sumsion and Bruno Weinberg Crocco, on the performance of the portfolios and the financial markets during 2022.

We are pleased to offer our Plan participants a diverse selection of investments to help achieve their college savings goals. The Plan includes age-based and risk-based (i.e., static) portfolios that invest primarily solely in Fidelity actively managed funds (i.e., Fidelity Funds Portfolios), a combination of Fidelity actively managed and Fidelity index funds (i.e., Fidelity Blend Portfolios) and Fidelity Index Portfolios that are invested in Fidelity index funds.

As you consider your investment options, you can also take comfort in knowing that earnings on your Plan investments will grow tax deferred and that withdrawals for qualified education expenses will be free from federal income tax and Delaware personal income tax. As a reminder, however, Plan participants should consult with a tax advisor regarding federal income tax considerations related to their account. Lastly, we encourage you to call Fidelity's dedicated college planning representatives at 1-800-544-1655 for a personalized review of your Plan account to help determine whether your investments are appropriately allocated based on your specific college savings goals.

Thank you for choosing the DE529 Education Savings Plan. We look forward to serving your needs for years to come.

Sincerely,
Colleen C. Davis, State Treasurer

Sincerely,
Donna Vieira Chair, Plans Management Board

Independent Auditor's Report

and the Participants of the DE529 Education Savings Plan Dover, Delaware

Report on the Audit of the Financial Statements

Opinions

We have audited the financial statements of the 36 investment portfolios listed below (collectively the "Portfolios") of the DE529 Education Savings Plan ("the Plan"), which comprise the statements of assets and liabilities, including schedules of investments as of December 31, 2022, the related statements of operations and changes in net assets for the year then ended, the financial highlights for the year then ended, and the related notes to the financial statements:

Delaware College Portfolio (Fidelity Funds)	Delaware Portfolio 2039 (Fidelity Index)
Delaware Portfolio 2024 (Fidelity Funds)	Delaware Portfolio 2042 (Fidelity Index)
Delaware Portfolio 2027 (Fidelity Funds)	Delaware Conservative Portfolio (Fidelity Index)

Delaware Portfolio 2033 (Fidelity Index)	Delaware Portfolio 2039 (Fidelity Blend)
Delaware Portfolio 2036 (Fidelity Index)	Delaware Portfolio 2042 (Fidelity Blend)

In our opinion, the accompanying financial statements present fairly, in all material respects, the respective financial position of the 36 investment portfolios as of December 31, 2022, and the respective operations and changes in net assets thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the DE529 Education Savings Plan and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

DE529 Education Savings Plan's management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting

503 Carr Road □ Suite 100 □ Wilmington, DE 19809

302.478.8940 □ www.btcpa.com

principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about DE529 Education Savings Plan's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of DE529 Education Savings Plan's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Plan's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Information Included in the Annual Report

Management is responsible for the other information included in the annual report. The other information comprises the *Message to Participants*, *Performance: The Bottom Line* and *Management's Discussion of Fund Performance* preambles for each of the Portfolios but does not include the financial statements and our auditor's report thereon. Our opinions on the financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated March 23, 2023 on our consideration of DE529 Education Savings Plan's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering DE529 Education Savings Plan's internal control over financial reporting and compliance.

Delaware College Portfolio (Fidelity Funds) Performance: The Bottom Line (Unaudited)

Average annual total returns take the Portfolio's cumulative return, located on the Fidelity.com web site, and show you what would have happened if the Portfolio had performed at a constant rate each year. During periods of reimbursement by Fidelity, a Portfolio's total return will be greater than it would be had the reimbursement not occurred.

Average Annual Total Returns

Periods ended December 31, 2022	Past 1 year	Past 5 years	Past 10 years
Delaware College Portfolio (Fidelity Funds)	-9.59%	1.43%	2.56%
Delaware College Portfolio Composite Index	-9.02%	1.82%	2.68%

\$10,000 Over 10 Years

Past 10 Years: Let's say hypothetically that \$10,000 was invested in Delaware College Portfolio (Fidelity Funds) on December 31, 2012 (past ten year period).

The chart shows how the value of that investment would have changed, and also shows how the Delaware College Portfolio Composite Index performed over the same period.

Delaware Portfolio 2024 (Fidelity Funds) Performance: The Bottom Line (Unaudited)

Average annual total returns take the Portfolio's cumulative return, located on the Fidelity.com web site, and show you what would have happened if the Portfolio had performed at a constant rate each year. During periods of reimbursement by Fidelity, a Portfolio's total return will be greater than it would be had the reimbursement not occurred.

\$10,000 Over 10 Years

Past 10 Years: Let's say hypothetically that \$10,000 was invested in Delaware Portfolio 2024 (Fidelity Funds) on December 31, 2012 (past ten year period).

The chart shows how the value of that investment would have changed, and also shows how the Delaware Portfolio 2024 Composite Index performed over the same period.

Understanding Performance

How a portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

\$10,000 Over 10 Years

Past 10 Years: Let's say hypothetically that \$10,000 was invested in Delaware Portfolio 2024 (Fidelity Index) on December 31, 2012 (past ten year period).

The chart shows how the value of that investment would have changed, and also shows how the Delaware Portfolio 2024 (Fidelity Index) Composite Index performed over the same period.

Understanding Performance

How a portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

Delaware Portfolio 2027 (Fidelity Index) Performance: The Bottom Line (Unaudited)

Average annual total returns take the Portfolio's cumulative return, located on the Fidelity.com web site, and show you what would have happened if the Portfolio had performed at a constant rate each year. During periods of reimbursement by Fidelity, a Portfolio's total return will be greater than it would be had the reimbursement not occurred.

Management's Discussion of Fund Performance (Unaudited)

Market Recap:

Asset prices around the world experienced a synchronous downturn for most of 2022, as a multitude of crosscurrents challenged the global economy and financial markets. Persistently high inflation in some markets, exacerbated by energy price shocks from the Russia-Ukraine conflict, spurred the U.S. Federal Reserve and other central banks to aggressively tighten monetary policy. This led to a broad retreat from risk and declining prices for stocks and bonds through September. In Q4, markets experienced a sharp reversal amid optimism on inflation and policy easing, and riskier assets rallied to cap a tumultuous year.

International equities returned -15.86% in 2022, according to the MSCI ACWI (All Country World Index) ex USA Index. By region, emerging markets (-20%) and Europe ex U.K. (-17%) notably lagged. Conversely, the U.K. (-4%) held up best, followed by Asia Pacific ex Japan (-8%). Among the 11 sectors, information technology (-34%) fared worst. Communication services and consumer discretionary (-21% each) also trailed the broader market. In contrast, energy gained 9% amid elevated prices for oil and natural gas.

U.S. stocks returned -19.53% for the year, as measured by the Dow Jones U.S. Total Stock Market Index. Among sectors, communication services (-41%) lagged most, followed by consumer discretionary (-37%). Conversely, energy (+63%) led by a wide margin. The defensive utilities (+1%) sector also notably outperformed. Value stocks handily outpaced growth among all market capitalizations. Commodities gained 16.09%, according to the Bloomberg Commodity Index Total Return.

U.S. taxable investment-grade bonds returned -13.01% in 2022, per the Bloomberg U.S. Aggregate Bond Index, amid soaring inflation and rising interest rates. The Fed raised its benchmark rate seven times, by 4.25 percentage points, while allowing up to billions in U.S. Treasuries and mortgage bonds to mature monthly without investing the proceeds. U.S. investment-grade corporate bonds (-15.26%) trailed U.S. Treasuries (-12.46%), while commercial mortgage-backed securities (-10.91%) and agencies (-7.87%) also lost ground. Outside the index, leveraged loans (-0.61%) bested the returns for Treasury Inflation-Protected Securities (-11.85%), U.S. high-yield bonds (-11.21%) and emerging-markets debt (-16.45%).

Comments from Co-Portfolio Managers Andrew Dierdorf, Brett Sumsion and Bruno Weinberg Crocco:

For the year, returns were negative for all the age-based (i.e., College, 2024, 2027, etc.) and risk-based (i.e., aggressive growth, moderate growth and conservative) strategies, including Fidelity Funds, Fidelity Blend and Fidelity Index Portfolios. For the age-based Fidelity Funds Portfolios, the longer-dated portfolios with higher allocations to equities performed the worst, largely because U.S. equities was among the weakest-performing asset classes in 2022. By comparison, the nearer-term age-based Fidelity Funds Portfolios with higher allocations to fixed income and short-term debt securities generated relatively better returns during the year. All the actively managed, age-based Fidelity Funds Portfolios underperformed their Composite indexes during the period. More specifically, investment performance among the underlying non-U.S. equity funds notably weighed on the Portfolios' relative results. In particular, within non-U.S. equities, Fidelity® Series Overseas Fund was a key detractor to the age-based Fidelity Funds Portfolios' relative results. This fund's -23.26% return trailed the -14.27% result of its benchmark, the MSCI EAFE Index. Underweighting U.S. investment-grade bond funds also detracted from the Fidelity Funds Portfolios relative performance, as did an overweighting in weak-performing long-term U.S. Treasury bonds. Conversely, investment performance among underlying U.S. equity funds added value versus Composites. For example, an allocation to Fidelity® Series Intrinsic Opportunities Fund (-3.50%) was helpful, as this fund topped its benchmark, the Russell 3000® Index (-19.21%). Out-of-Composite exposure to commodities also contributed, as this group gained 16.09%, according to the Bloomberg Commodity Index Total Return. The age-based Fidelity Index portfolios performed roughly in line with their respective Composite indexes in 2022. One of three actively managed, risk-based Fidelity Funds Portfolios outperformed their respective Composite indexes the past year, and each of the age-based Fidelity Blend Portfolios lagged their Composites. *(For specific performance results for all portfolios, please refer to the performance section of this report.)*

Fidelity Funds Portfolios invest in a combination of Fidelity equity, commodity, fixed-income and short-term funds, which are primarily actively-managed by Fidelity Management & Research Company LLC (FMR), an affiliated adviser or sub-adviser, or Geode Capital Management, LLC (Geode), a registered investment adviser. Fidelity Index Portfolios invest in a combination of Fidelity equity, commodity, fixed-income and short-term funds, which are primarily passively managed by FMR, an affiliated adviser or sub-adviser, or Geode. There are individual fund Portfolios which invest in a single equity or fixed-income fund, also managed by FMR, an affiliated adviser or sub-adviser, or Geode. Delaware Bank Deposit Portfolio invests in an interest-bearing account held at Wells Fargo Bank, N.A. Delaware Stable Value Portfolio (Stable Value Portfolio) invests in Delaware Stable Value Admin Pool (Stable Value Admin Pool), which is a separately managed account (SMA) formed to pool together Fidelity Education Income Fund (and four wrap contracts), as well as Fidelity Series Government Money Market Fund. The Stable Value Portfolio looks through and reports these underlying assets. Fidelity Blend Portfolios invest in a combination of Fidelity equity, commodity, fixed-income and short-term funds which are both actively- and passively-managed by FMR, an affiliated adviser or sub-adviser, or Geode. Fidelity equity, commodity, fixed-income and short-term funds are collectively referred to as Underlying Funds.

2. Significant Accounting Policies:

The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP), which require management to make certain estimates and assumptions at the date of the financial statements. Actual results could differ from those estimates. Subsequent events, if any, through the date that the financial statements were available to be issued, March 23, 2023, have been evaluated in the preparation of the financial statements. The Portfolios qualify as investment companies under FASB ASC 946 *Financial Services - Investment Companies* and follows the accounting and reporting guidance for investment companies. The Portfolios' Schedules of

Notes to Financial Statements – continued

Investments or Statements of Assets and Liabilities lists each of the Underlying Funds as an investment of each Portfolio but do not include the underlying holdings of each Underlying Fund. The following summarizes the significant accounting policies of the Portfolios:

Investment Valuation. Investments are valued as of 4:00 p.m. Eastern time on the last calendar day of the period. Each Portfolio categorizes the inputs to valuation techniques used to value its investments into a disclosure hierarchy consisting of three levels as shown below:

- Level 1 - quoted prices in active markets for identical investments
- Level 2 - other significant observable inputs
- Level 3 - unobservable inputs (including each Portfolio's own assumptions based on the best information available)

Valuation techniques used to value each Portfolio's investments by major category are as follows: Investments in the Underlying Funds are valued at their closing net asset value (NAV) each business day and are categorized as Level 1 in the hierarchy. As of December 31, 2022, all investments held by the Portfolios are categorized as Level 1 under the Fair Value Hierarchy except for the wrap contracts at value in the Stable Value Portfolio which are categorized as Level 2.

The underlying assets in the Stable Value Portfolio are marked to market daily and reported to the Trust. In addition, wrap contracts with respect to the underlying assets in the Stable Value Portfolio seek to provide for minimal fluctuation in principal values. The wrap contracts are issued by various insurance wrap providers and reported to Fidelity monthly at contract value (also known as book value). Investments in wrap contracts are fair valued using a model that considers recent fee bids as determined by recognized dealers, discount rate, crediting rate, yield to maturity and the duration of the underlying portfolio securities, and are categorized as Level 2 in the hierarchy. The dealers may consider the following in the bid process: size of the portfolio, performance of the underlying portfolio, plan cash flow, and the fair value to contract value ratio.

The Stable Value Portfolio wholly owns the Stable Value Admin Pool. The following wrap contracts were held by the Stable Value Admin Pool at December 31, 2022. All contracts reflect annual net effective yields at period end. Crediting rates are generally adjusted periodically and thus tied to the performance of the underlying assets. Wrap contract providers agree to wrap a pro-rata percentage of the Stable Value Admin Pool.

The contract value above is representative of the volume of trading during the year.

Investment Transactions and Income. For financial reporting purposes, the Portfolios' investment holdings and NAV include trades executed through the end of the last business day of the period. The NAV per unit for processing participant transactions is calculated as of the close of business of the New York Stock Exchange (NYSE), normally 4:00 p.m. Eastern time, and includes trades executed through the end of the prior business day. Gains and losses on securities sold are determined on the basis of average cost. Income and capital gain distributions from the Underlying Funds, if any, are recorded on the ex-dividend date. Interest income is accrued as earned, if applicable. There are no distributions of net investment gains or net investment income to the Portfolios' participants or beneficiaries.

Expenses. Expenses are recorded on the accrual basis. Expense estimates are accrued in the period to which they relate and adjustments are made when actual amounts are known. Expenses included in the accompanying financial statements reflect the expenses of each Portfolio and do not include any expenses associated with any underlying mutual funds.

Other. There are no unrecognized tax benefits in the accompanying financial statements in connection with the tax positions taken by each Portfolio. The Portfolios do not file any tax returns since the Trust is exempt from federal and state income tax under Section 529 of the IRC. Amounts withdrawn for reasons other than payment of qualified education expenses generally will be subject to a 10% federal tax penalty on earnings in addition to the income tax that is due. These taxes are payable directly by account owners and therefore are not deducted from the assets of the Portfolios.

3. Fees:

The Trustee has entered into a Management and Administrative Services agreement with Fidelity Brokerage Services, LLC (FBS) to provide administrative, record keeping, distribution and marketing services to the Trust. According to this agreement and a related investment advisory agreement with FMR, an investment adviser registered under the Investment Advisers Act of 1940 that provides investment management services to the Trust, a Management and Administration Fee is charged to the Portfolios at an annual rate based on the net assets of each Portfolio. The Management and Administration Fee has up to three components, a Program Manager Fee that is paid to FMR, a Bank Administration Fee that is paid to FBS and a State Fee that is paid to the Trustee.

Management Fees. Portfolio Management Fees are assessed against assets and paid to the Program Manager for Fidelity Funds Portfolios, Fidelity Index Portfolios and Fidelity Blend Portfolios. For Age-Based Fidelity Funds Portfolios and Age-Based Fidelity Blend Portfolios, this fee will be reduced annually until a Portfolio's asset allocation aligns and merges with the respective College Portfolio. The fee reduction is reflected in the following Portfolio Management Fee Rolldown Schedule. The current Portfolio Management Fees for all Portfolios is disclosed in the most recent Fact Kit.

* Portfolio Years represent each Age-Based Fidelity Funds Portfolio and Fidelity Blend Portfolio and the approximate year ranges between each Portfolio until the oldest Age-Based Portfolio reaches the year that it merges with the College Portfolio. For example, as of January 1, 2024, the Age-Based Portfolio 2039 is expected to be next to 15 Years to College and 0.64% for Fidelity Funds Portfolios and 0.45% for Fidelity Blend Portfolios.

Stable Value Insurance Wrap Fee. There is a Stable Value Insurance Wrap Fee that is paid to the third-party insurance issuers of the insurance contracts that wrap the long-term underlying investments of the Stable Value Portfolio. This fee is a contractual fee assessed against the long-term assets of the Stable Value Portfolio and is currently at an annual rate of 0.15% of net assets but may increase based on the contract terms with the insurance providers.

For the period ended December 31, 2022 FMR voluntarily agreed to waive certain fees in order to avoid a negative yield for the following portfolio. Waivers are shown on the Portfolio's Statement of Operations under the caption "Expense reductions".

4. Wrap Contracts:

A wrap contract is an agreement by another party, such as a bank or insurance company, to make payments to a portfolio in certain circumstances. Wrap contracts are designed to help preserve principal while providing a consistent, positive return for participants and to protect a portfolio in extreme circumstances, such as volatility in the market that would negatively affect the fair value of the underlying asset. In a typical wrap contract, the wrap issuer agrees to pay a portfolio the difference between the contract value and the market value of the underlying assets once the market value has been totally exhausted. This could happen if a portfolio experiences significant redemptions (redemption of most of a portfolio's units) during a time when the market value of a portfolio's underlying assets is below contract value, and market value is ultimately reduced to zero. If that occurs, the wrap issuer agrees to pay a portfolio an amount sufficient to cover unitholder redemptions and certain other payments, such as portfolio expenses, provided all the terms of the wrap contract have been met. Purchasing wrap contracts is similar to buying insurance, in that a portfolio pays a relatively small amount to protect against a relatively unlikely event (the redemption of most of the shares of a portfolio). Fees the Stable Value Portfolio pays for wrap contracts are offset against interest income on the Statement of Operations.

In selecting wrap issuers, FMR analyzes the proposed terms of the wrap contract and the credit quality of the wrap issuer. Other factors, including the availability of wrap contracts under certain market or competitive conditions, may affect the number of wrap issuers and the terms of the wrap contracts held by the Stable Value Portfolio. The Stable Value Portfolio may agree to additional limitations on its investments as a condition of the wrap contracts. These may include maximum duration limits, minimum credit standards, and diversification requirements. In addition, a wrap issuer may require that the Stable Value Portfolio invest entirely in cash or cash equivalents under certain conditions. Generally, as long as the Stable Value Portfolio is in compliance with the conditions of its wrap contracts, it may buy and sell underlying assets without impacting the contract value of the underlying assets.

FMR normally purchases wrap contracts from issuers rated in the top long-term rating categories (A- or the equivalent and above) by any one of the nationally recognized statistical rating organizations. FMR normally intends to enter into wrap contracts with multiple parties, but may have a single wrap issuer for all of the Stable Value Portfolio's underlying assets. FMR may terminate and replace wrap contracts under various circumstances, including when there is a default by the wrap issuer.

FMR purchases wrap contracts for the Stable Value Portfolio with the aim of maintaining the contract value of the Stable Value Portfolio's underlying assets, as contract value is the amount that the participants transact at. FMR invests the Stable Value Portfolio's assets consistent with the terms of the wrap contracts. As a target, FMR expects a substantial percentage (up to 99%) of the Stable Value Portfolio's assets to be underlying the wrap contracts, although FMR may change this target from time to time based on factors, such as the availability of capacity under the Stable Value Portfolio's wrap contracts or the availability of wrap contract capacity generally within the market for such instruments. Assets not underlying the wrap contracts will generally be invested in money market instruments and cash equivalents to help the Stable Value Portfolio maintain a stable NAV and to provide necessary liquidity for unitholder withdrawals and exchanges.

Wrap contracts accrue interest using a formula called the "crediting rate." Wrap contracts use the crediting rate formula to convert market value changes in the underlying assets into income distributions in order to minimize the difference between the market and contract value of the underlying assets over time. Using the crediting rate formula, an estimated future market value is calculated by compounding a portfolio's current market value at such portfolio's current yield to maturity for a period equal to such portfolio's duration. The crediting rate is the discount rate that equates that estimated future market value with such portfolio's current contract value.

Crediting rates are reset monthly. The wrap contracts provide a guarantee that the crediting rate will not fall below 0%. The crediting rate, and hence a portfolio's return, may be affected by many factors, including purchases and redemptions by unitholders. The impact depends on whether the market value of the underlying assets is higher or lower than the contract value of those assets. If the market value of underlying assets is higher than their contract value, the crediting rate will ordinarily be higher than the yield of the underlying assets. Under these circumstances, cash from new investors will tend to lower the crediting rate and a portfolio's return, and redemptions by existing unitholders will tend to increase the crediting rate and a portfolio's return.

If the market value of underlying assets is lower than their contract value, the crediting rate will ordinarily be lower than the yield of the underlying assets. When the market value is lower than the contract value, a portfolio will have, for example, less than \$10.00 in cash and bonds for every \$10.00 in net assets available for benefits. Under these circumstances, cash from new investors will tend to increase the market value attributed to the underlying assets and to increase the crediting rate and a portfolio's return. Redemptions by existing unitholders will have the opposite effect, and will tend to reduce the market value attributed to the underlying assets and to reduce the crediting rate and a

Notes to Financial Statements – continued

portfolio's return. Generally, the market value of underlying assets will tend to be higher than contract value after interest rates have fallen due to higher bond prices. Conversely, the market value of underlying assets will tend to be lower than their contract value after interest rates have risen due to lower bond prices.

If a portfolio experiences significant redemptions when the market value is below the contract value, a portfolio's yield may be reduced significantly, to a level that is not competitive with other investment options. This may result in additional redemptions, which would tend to lower the crediting rate further. If redemptions continued, a portfolio's yield could be reduced to zero. If redemptions continued thereafter, a portfolio might have insufficient assets to meet redemption requests, at which point a portfolio would require payments from the wrap issuer to pay further unitholder redemptions.

The table below summarizes the type, fair value, the unrealized gains, unrealized losses and the change in net unrealized appreciation (depreciation) on the wrap contracts during the period, as presented in the Statement of Operations.

	Fair Value	Unrealized Gains	Unrealized Losses	Change in Net Unrealized Appreciation (Depreciation)
Wrap Contracts	\$498,291	\$498,291	\$ -	\$498,291

5. Other Information:

In the normal course of business, the Portfolios may enter into contracts that provide general indemnifications. The Portfolios' maximum exposure under these arrangements is unknown as this would be dependent on future claims that may be made against the Portfolios. The risk of material loss from such claims is considered remote.

The Portfolios do not invest in the Underlying Funds for the purpose of exercising management or control; however, investments by the Portfolios within their principal investment strategies may represent a significant portion of an Underlying Fund's net assets. At the end of the period, no Portfolios held a significant portion of the outstanding shares of any Underlying Fund.

6. Risk and Uncertainties:

Many factors affect a portfolio's performance. Developments that disrupt global economies and financial markets, such as pandemics, epidemics, outbreaks of infectious diseases, war, terrorism, and environmental disasters, may significantly affect a portfolio's investment performance. The effects of these developments to a portfolio will be impacted by the types of securities in which a portfolio invests, the financial condition, industry, economic sector, and geographic location of an issuer, and a portfolio's level of investment in the securities of that issuer.

Wrap Contract Risk. The Stable Value Portfolio is unlikely to maintain a stable NAV if, for any reason, it cannot obtain or maintain wrap contracts covering its underlying assets that are not otherwise invested in stable NAV money market funds. This could result, for example, from the Stable Value Portfolio's inability to promptly find a replacement wrap contract following termination of a wrap contract. FMR will attempt to assess the credit quality of wrap issuers, but there is no guarantee as to the financial condition of a wrap issuer. The issuer's ability to meet its contractual obligations under the wrap contracts may be effected by future economic and regulatory developments. Wrap contracts are non-transferable and have no trading market. There are a limited number of wrap issuers and, with respect to those wrap issuers, a limited amount of wrap capacity. The Stable Value Portfolio may lose the benefit of wrap contracts on any portion of its assets in default in excess of a certain percentage of portfolio assets. In the event that wrap contracts fail to perform as intended, the Stable Value Portfolio's NAV may decline if the market value of its assets declines.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Plan's internal control over financial reporting ("internal control") as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control. Accordingly, we do not express an opinion on the effectiveness of the Plan's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the Plan's financial statements will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Plan's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of This Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Plan's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Plan's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
