Sustainable and impact investing pools offer strategies that consider social and environmental factors while also emphasizing financial returns.

Non-Publicly Traded Assets/ Complex Assets

DONATE MORE THAN JUST CASH

Donating cash is always easy, whether by check, bank wire, or EFT. And when you donate cash, you can generally deduct up to 60% of your adjusted gross income (AGI). But cash isn't the only thing you can use to fund your Giving Account. You can also donate a variety of other assets, including:

- Long-term appreciated securities, such as mutual fund shares, bonds, and publicly traded stock, including company stock received as part of equity compensation
- Cash value of life insurance policies
- Non-publicly traded assets, including restricted company stock and certain cryptocurrencies

Provided you've held them for more than a year, these types of assets are generally deductible at fair market value (FMV), up to 30% of your AGI.

BENEFITS:

- Potential to minimize capital gains tax on the sale of the asset
- Leverage the value of highly appreciated, non-publicly traded assets to provide support to the charitable causes you care most about
- Donations are processed so that the highest possible percentage of the funds from the sale are available for grants to charities
- Charities don't have to outsource compliance and liquidation work or incur the potential costs associated with complex IRS rules and regulations

DONATING NON-PUBLICLY TRADED ASSETS

If you have non-publicly traded assets with unrealized long-term capital gains, you typically have to sell them yourself before you can donate the proceeds to charity. But with a Giving Account, you can donate these assets directly to Fidelity Charitable, and we will work to liquidate the assets. You'll generally be eligible to take a deduction for the full FMV, and the charities you support may receive more than if you had sold the asset yourself. Best of all, we don't charge any fees to review and accept these assets, so 100% of the proceeds will go to your Giving Account.

Types of non-publicly traded assets we accept:

- Private company stock (S-Corp, C-Corp)
- LLC and Limited Partnership interests
- Restricted stock
- Bitcoin and other cryptocurrencies

Questions you should consider:

- Does your current financial plan reflect your values?
- What impact do you want your charitable giving to make now and in the future?
- How do you give today?
- How frequently are you giving to charity?
- What types of assets have you donated in the past?

Qualifications:

Anyone can establish a Fidelity Charitable Giving Account. However, if you're a Fidelity Investments customer, it's especially easy to donate funds directly from your Fidelity brokerage account.

There's no minimum initial contribution or balance required. Once you've opened and funded your Giving Account, you can start recommending grants right away. The minimum grant recommendation is \$50.

FEES:

\$100 or 0.6% administrative fee*

This annual fee is based on your Giving Account balance and covers services like processing transactions and donor support. The more you donate, the lower the percentage.

0.015%–0.97% investment fee (as of September 2020)

Investment fees are based on how your donation is invested.

*Whichever is greater.
