Trustee's Message to Participants (Unaudited)

Dear Participant:

On behalf of the State of New Hampshire and the College Tuition Savings Plan Advisory Commission (the "Commission"), I am pleased to provide you with the annual report for the UNIQUE College Investing Plan (the "Plan").

The annual report is designed to provide participants with an opportunity to review the Plan in depth, including the performance of the portfolios, along with expense, holdings and asset allocation information. Also included is the *Management's Discussion of Fund Performance*, which reflects commentary from the UNIQUE Plan co-portfolio managers, offering insight into the performance of the portfolios and the markets during the past year.

We understand that our participants are concerned about how to save and pay for a college education, and we know that every dollar saved is important. You can take comfort in knowing that any growth of your investments will be tax deferred and withdrawals for qualified higher education expenses will be free from federal income tax. As a reminder, however, UNIQUE Plan participants should consult with their tax advisor regarding federal income tax considerations related to their account. Lastly, we encourage you to call Fidelity's dedicated college planning representatives at 1-800-544-1914 to review your account to help determine whether your investments are appropriately allocated based on your college savings goals.

Thank you for choosing the UNIQUE College Investing Plan. We look forward to serving your needs for years to come.

Sincerely,

Monica I. Mezzapelle
State Treasurer and Trustee
State of New Hampshire

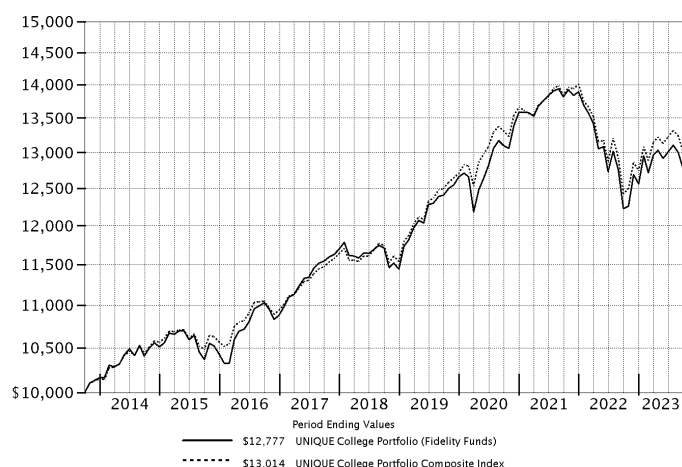

UNIQUE College Portfolio (Fidelity Funds) Performance: The Bottom Line (Unaudited)

Average annual total returns take the Portfolio's cumulative return, located on the Fidelity.com web site, and show you what would have happened if the Portfolio had performed at a constant rate each year. During periods of reimbursement by Fidelity, a Portfolio's total return will be greater than it would be had the reimbursement not occurred.

Average Annual Total Returns

Periods ended September 30, 2023	Past 1 year	Past 5 years	Past 10 years
UNIQUE College Portfolio (Fidelity Funds)	4.52%	1.75%	2.48%
UNIQUE College Portfolio Composite Index	4.76%	2.07%	2.67%

\$10,000 Over 10 Years

Past 10 Years: Let's say hypothetically that \$10,000 was invested in UNIQUE College Portfolio (Fidelity Funds) on September 30, 2013 (past ten year period).

The chart shows how the value of that investment would have changed, and also shows how the UNIQUE College Portfolio Composite Index performed over the same period.

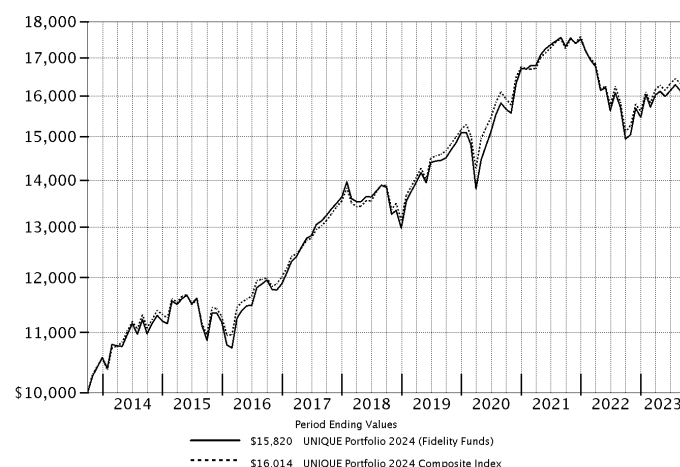

UNIQUE Portfolio 2024 (Fidelity Funds) Performance: The Bottom Line (Unaudited)

Average annual total returns take the Portfolio's cumulative return, located on the Fidelity.com web site, and show you what would have happened if the Portfolio had performed at a constant rate each year. During periods of reimbursement by Fidelity, a Portfolio's total return will be greater than it would be had the reimbursement not occurred.

Average Annual Total Returns

Periods ended September 30, 2023	Past 1 year	Past 5 years	Past 10 years
UNIQUE Portfolio 2024 (Fidelity Funds)	5.91%	2.70%	4.69%
UNIQUE Portfolio 2024 Composite Index	6.00%	2.91%	4.82%

\$10,000 Over 10 Years

Past 10 Years: Let's say hypothetically that \$10,000 was invested in UNIQUE Portfolio 2024 (Fidelity Funds) on September 30, 2013 (past ten year period).

The chart shows how the value of that investment would have changed, and also shows how the UNIQUE Portfolio 2024 Composite Index performed over the same period.

Understanding Performance

How a portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

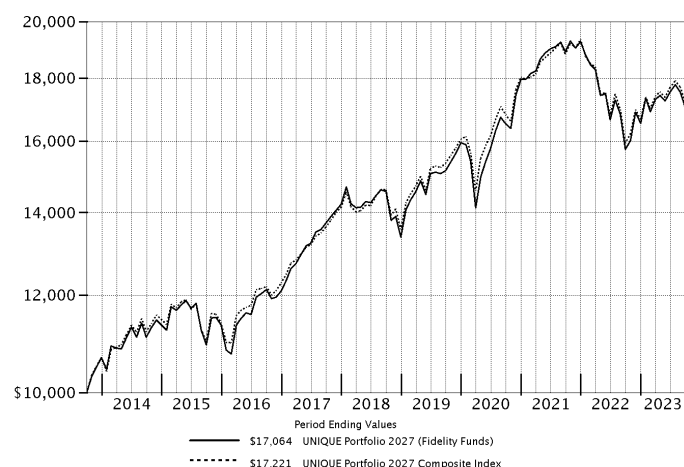

UNIQUE Portfolio 2027 (Fidelity Funds) Performance: The Bottom Line (Unaudited)

Average annual total returns take the Portfolio's cumulative return, located on the Fidelity.com web site, and show you what would have happened if the Portfolio had performed at a constant rate each year. During periods of reimbursement by Fidelity, a Portfolio's total return will be greater than it would be had the reimbursement not occurred.

Average Annual Total Returns

\$10,000 Over 10 Years

Past 10 Years: Let's say hypothetically that \$10,000 was invested in UNIQUE Portfolio 2030 (Fidelity Funds) on September 30, 2013 (past ten year period).

The chart shows how the value of that investment would have changed, and also shows how the UNIQUE Portfolio 2030 Composite Index performed over the same period.

Understanding Performance

How a portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. \$10,000 Over Life of Portfolio

Life of Portfolio: Let's say hypothetically that \$10,000 was invested in UNIQUE Portfolio 2042 (Fidelity Index) on December 28, 2022, when the Portfolio started.

The chart shows how the value of that investment would have changed, and also shows how the UNIQUE Portfolio 2042 (Fidelity Index) Composite Index performed over the same period.

Understanding Performance

How a portfolio did yesterday is no guarantee of how it will do tomorrow. The stock market, for example, has a history of long-term growth and short-term volatility. In turn, the unit price and return of a portfolio that invests in stocks will vary. That means if you sell your units during a market downturn, you might lose money. But if you can ride out the market's ups and downs, you may have a gain.

Management's Discussion of Fund Performance (Unaudited)

Market Recap:

For the 12 months ending September 30, 2023, continued global economic expansion and a slowing in the pace of inflation contributed to a favorable backdrop for risk assets. After struggling throughout much of 2022, risk assets strongly rebounded the past 12 months, with U.S. large-cap stocks leading the way. In the U.S., the upturn was driven partly by a narrow set of companies in the information technology and communication services sectors amid excitement for generative artificial intelligence. Meanwhile, monetary tightening by the U.S. Federal Reserve and other central banks continued amid elevated inflation.

International equities rose 20.60% for the 12 months, according to the MSCI ACWI (All Country World Index) ex USA Index. All regions gained, with Europe ex U.K. (+31%) leading the way. Japan (+26%) and the U.K. (+25%) also outperformed, whereas Asia Pacific ex Japan (+11%) lagged by the widest margin. Each of the 11 sectors advanced, with information technology (+30%), industrials (+29%) and energy (+28%) being the top performers. Conversely, real estate (+5%) lagged most, followed by consumer staples (+9%). U.S. stocks gained 20.49% for the 12 months, as measured by the Dow Jones U.S. Total Stock Market Index, as all but two sectors rose. Information technology (+41%), communication services (+35%) and energy (+29%) led by the widest margin. Conversely, utilities (-7%) and real estate (-1%) lagged most. Growth stocks broadly outpaced value, while larger-caps topped small-caps. Commodities returned -1.30%, according to the Bloomberg Commodity Index Total Return.

U.S. taxable investment-grade bonds returned 0.64% for the 12 months, per the Bloomberg U.S. Aggregate Bond Index, amid elevated inflation and rising interest rates. Since March 2022, the Fed has hiked its benchmark interest rate 11 times, by 5.25 percentage points, while allowing up to billions in bonds to mature each month without investing the proceeds. Short-term U.S. Treasuries (+4.58%) topped U.S. investment-grade corporate bonds (+3.47%), while commercial mortgage-backed securities returned (+1.19%) and agencies gained (+2.10%). Outside the index, leveraged loans (+13.39%), U.S. high-yield bonds (+8.24%) and emerging-markets debt (+8.61%) rose, whereas Treasury Inflation-Protected Securities (+1.25%) experienced a modest gain.

Comments from Co-Portfolio Managers Andrew Dierdorf, Brett Sumsion and Bruno Weinberg Crocco:

For the fiscal year, all the actively managed age-based Fidelity Fund Portfolios of the UNIQUE College Investing Plan produced a positive return. A majority of the Portfolios outperformed their respective Composite indexes the past 12 months, with only the two most conservative Portfolios modestly lagging. Digging deeper, the performance of the underlying investment funds meaningfully contributed to the age-based Portfolios' relative results. In particular, security selection among the underlying U.S. equity funds added value versus Composites, especially Fidelity® Series Large Cap Stock Fund (28.08%), which outpaced its benchmark, the S&P 500® index (+21.62%). Fidelity® Series Growth Company Fund (+31.60%) also contributed, given its outperformance of the Russell 3000® Growth Index. Underlying investments among U.S. investment-grade bonds also helped. In particular, Fidelity® Series Investment Grade Bond Fund (+1.78%) outperformed the 0.64% result of its benchmark, the Bloomberg U.S. Aggregate Bond Index. Conversely, active asset allocation modestly detracted from the age-based Portfolios' performance versus Composites the past 12 months. More specifically, an underweight in outperforming U.S. equities weighed on the Portfolios' relative results. An overweight in lagging long-term U.S. Treasury bonds also detracted. The three risk-managed, or "static," Fidelity Funds Portfolios - NH Aggressive Growth Portfolio, NH Moderate Growth Portfolio and NH Conservative Portfolio - had mixed results relative to their Composite indexes this period. Both NH Aggressive Growth Portfolio and NH Moderate Growth Portfolio outperformed their Composite indexes, whereas NH Conservative Portfolio modestly underperformed. The age-based and risk-based Fidelity Index Portfolios all performed roughly in line with their respective Composite indexes. The age-based Fidelity Blend Portfolios had mixed results versus Composite indexes. *(For specific results for Fidelity® UNIQUE College Investing Plan Portfolios, please refer to the performance section of this report.)*

Fidelity Funds Portfolios invest in a combination of Fidelity equity, commodity, fixed-income and short-term funds, which are primarily actively-managed by Fidelity Management & Research Company LLC (FMR), an affiliated adviser or sub-adviser, or Geode Capital Management, LLC (Geode), a registered investment adviser. Fidelity Index Portfolios invest in a combination of Fidelity equity, commodity, fixed-income and short-term funds, which are primarily passively managed by FMR, an affiliated adviser or sub-adviser, or Geode. There are individual fund Portfolios which invest in a single equity or fixed-income fund, also managed by FMR, an affiliated adviser or sub-adviser, or Geode. UNIQUE Bank Deposit Portfolio invests in an interest-bearing account held at Wells Fargo Bank, N.A. UNIQUE Stable Value Portfolio (Stable Value Portfolio) invests in UNIQUE Stable Value Admin Pool (Stable Value Admin Pool), which is a separately managed account (SMA) formed to pool together Fidelity Education Income Fund (and four wrap contracts), as well as Fidelity Series Government Money Market Fund. The Stable Value Portfolio looks through and reports these underlying assets. Fidelity Blend Portfolios invest in a combination of Fidelity equity, commodity, fixed-income and short-term funds which are both actively- and passively-managed by FMR, an affiliated adviser or sub-adviser, or Geode. Fidelity equity, commodity, fixed-income and short-term funds are collectively referred to as Underlying Funds.

About every three years, Fidelity creates a new Age-Based Portfolio for the youngest beneficiaries and transfers the assets in the oldest Age-Based Portfolio to the College Portfolio. The transfer process usually occurs when the portfolio reaches an allocation similar to that of the College Portfolio. All transfers were made on the relative net asset value of the Portfolio 2021 and College Portfolio at the time of transfer. The purpose of this transaction was to move the assets of the expiring portfolio into an existing portfolio.

The following Portfolio commenced operations on December 28, 2022:

2. Significant Accounting Policies:

The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP), which require management to make certain estimates and assumptions at the date of the financial statements. Actual results could differ from those estimates. Subsequent events, if any, through the date that the financial statements were available to be issued, December 14, 2023, have been evaluated in the preparation of the financial statements. The Portfolios qualify as investment companies under FASB ASC 946 *Financial Services - Investment Companies* and follows the accounting and reporting guidance for investment companies. The Portfolios' Schedules of

Notes to Financial Statements – continued

Investments or Statements of Assets and Liabilities lists each of the Underlying Funds as an investment of each Portfolio but do not include the underlying holdings of each Underlying Fund. The following summarizes the significant accounting policies of the Portfolios:

Investment Valuation. Investments are valued as of 4:00 p.m. Eastern time on the last calendar day of the period. Each Portfolio categorizes the inputs to valuation techniques used to value its investments into a disclosure hierarchy consisting of three levels as shown below:

- Level 1 - unadjusted, quoted prices in active markets for identical investments
- Level 2 - other significant observable inputs
- Level 3 - unobservable inputs (including each Portfolio's own assumptions based on the best information available)

Valuation techniques used to value each Portfolio's investments by major category are as follows: Investments in the Underlying Funds are valued at their closing net asset value (NAV) each business day and are categorized as Level 1 in the hierarchy. As of September 30, 2023, all investments held by the Portfolios are categorized as Level 1 under the Fair Value Hierarchy except for the wrap contracts at value in the Stable Value Portfolio which are categorized as Level 2.

The underlying assets in the Stable Value Portfolio are marked to market daily and reported to the Trust. In addition, wrap contracts with respect to the underlying assets in the Stable Value Portfolio seek to provide for minimal fluctuation in principal values. The wrap contracts are issued by various insurance wrap providers and reported to Fidelity monthly at contract value (also known as book value). Investments in wrap contracts are fair valued using a model that considers recent fee bids as determined by recognized dealers, discount rate, crediting rate, yield to maturity and the duration of the underlying portfolio securities, and are categorized as Level 2 in the hierarchy. The dealers may consider the following in the bid process: size of the portfolio, performance of the underlying portfolio, plan cash flow, and the fair value to contract value ratio.

The Stable Value Portfolio wholly owns the Stable Value Admin Pool. The following wrap contracts were held by the Stable Value Admin Pool at September 30, 2023. All contracts reflect annual net effective yields at period end. Crediting rates are generally adjusted periodically and thus tied to the performance of the underlying assets. Wrap contract providers agree to wrap a pro-rata percentage of the Stable Value Admin Pool.

Investment Transactions and Income. For financial reporting purposes, the Portfolios' investment holdings and NAV include trades executed through the end of the last business day of the period. The NAV per unit for processing participant transactions is calculated as of the close of business of the New York Stock Exchange (NYSE), normally 4:00 p.m. Eastern time, and includes trades executed through the end of the prior business day. Gains and losses on securities sold are determined on the basis of average cost. Income and capital gain distributions from the Underlying Funds, if any, are recorded on the ex-dividend date. Interest income is accrued as earned, if applicable. There are no distributions of net investment gains or net investment income to the Portfolios' participants or beneficiaries.

Expenses. Expenses are recorded on the accrual basis. Expense estimates are accrued in the period to which they relate and adjustments are made when actual amounts are known. Expenses included in the accompanying financial statements reflect the expenses of each Portfolio and do not include any expenses associated with any underlying mutual funds.

Other. There are no unrecognized tax benefits in the accompanying financial statements in connection with the tax positions taken by each Portfolio. The Portfolios do not file any tax returns since the Trust is exempt from federal and state income tax under Section 529 of the IRC. Amounts withdrawn for reasons other than payment of qualified education expenses generally will be subject to a 10% federal tax penalty on earnings in addition to the income tax that is due. These taxes are payable directly by account owners and therefore are not deducted from the assets of the Portfolios.

3. Fees:

The Trustee has entered into a Management and Administrative Services agreement with Fidelity Brokerage Services, LLC (FBS) to provide administrative, record keeping, distribution and marketing services to the Trust. According to this agreement and a related investment advisory agreement with FMR, an investment adviser registered under the Investment Advisers Act of 1940 that provides investment management services to the Trust, a Management and Administration Fee is charged to the Portfolios at an annual rate based on the net assets of each Portfolio. The Management and Administration Fee has up to three of the following components: a Program Manager Fee that is paid to FMR, a Bank Administration Fee that is paid to FBS, a State Assessment (previously known as "State Fee") that is paid to the Trustee and a Portfolio Management Fee, which is further explained below the table.

Portfolios	Invested in	Fee type	Rate

Management Fees. Portfolio Management Fees are assessed against net assets and paid to the Program Manager for Fidelity Funds Portfolios, Fidelity Index Portfolios and Fidelity Blend Portfolios. For Age-Based Fidelity Index Portfolios, this fee is 0.05%. For UNIQUE Conservative Portfolio (Fidelity Funds), UNIQUE Moderate Growth Portfolio (Fidelity Funds) and UNIQUE Aggressive Growth Portfolio (Fidelity Funds), this fee is 0.30%, 0.67% and 0.78%, respectively. For UNIQUE Conservative Portfolio (Fidelity Index), UNIQUE Moderate Growth Portfolio (Fidelity Index) and UNIQUE Aggressive Growth Portfolio (Fidelity Index), this fee is 0.04%. For the Stable Value Portfolio, this fee is 0.30%. For Age-Based Fidelity Funds Portfolios and Age-Based Fidelity Blend Portfolios, this fee will be reduced annually until a Portfolio's asset allocation aligns and merges with the respective College Portfolio. The fee reduction is reflected

For example, as of January 2024, the Age-Based Portfolio 2039 is expected to be next to 15 Years to College and 0.64% for Fidelity Funds Portfolios and 0.45% for Fidelity Blend Portfolios.

Stable Value Insurance Wrap Fee. There is a Stable Value Insurance Wrap Fee that is paid to the third-party insurance issuers of the insurance contracts that wrap the long-term underlying investments of the Stable Value Portfolio. This fee is a contractual fee assessed against the long-term assets of the Stable Value Portfolio and is currently at an annual rate of 0.15% of net assets but may increase based on the contract terms with the insurance providers.

4. Wrap Contracts:

A wrap contract is an agreement by another party, such as a bank or insurance company, to make payments to a portfolio in certain circumstances. Wrap contracts are designed to help preserve principal while providing a consistent, positive return for participants and to protect a portfolio in extreme circumstances, such as volatility in the market that would negatively affect the fair value of the underlying asset. In a typical wrap contract, the wrap issuer agrees to pay a portfolio the difference between the contract value and the market value of the underlying assets once the market value has been totally exhausted. This could happen if a portfolio experiences significant redemptions (redemption of most of a portfolio's units) during a time when the market value of a portfolio's underlying assets is below contract value, and market value is ultimately reduced to zero. If that occurs, the wrap issuer agrees to pay a portfolio an amount sufficient to cover unitholder redemptions and certain other payments, such as portfolio expenses, provided all the terms of the wrap contract have been met. Purchasing wrap contracts is similar to buying insurance, in that a portfolio pays a relatively small amount to protect against a relatively unlikely event (the redemption of most of the shares of a portfolio). Fees the Stable Value Portfolio pays for wrap contracts are offset against interest income on the Statement of Operations.

In selecting wrap issuers, FMR analyzes the proposed terms of the wrap contract and the credit quality of the wrap issuer. Other factors, including the availability of wrap contracts under certain market or competitive conditions, may affect the number of wrap issuers and the terms of the wrap contracts held by the Stable Value Portfolio. The Stable Value Portfolio may agree to additional limitations on its investments as a condition of the wrap contracts. These may include maximum duration limits, minimum credit standards, and diversification requirements. In addition, a wrap issuer may require that the Stable Value Portfolio invest entirely in cash or cash equivalents under certain conditions. Generally, as long as the Stable Value Portfolio is in compliance with the conditions of its wrap contracts, it may buy and sell underlying assets without impacting the contract value of the underlying assets.

FMR normally purchases wrap contracts from issuers rated in the top long-term rating categories (A- or the equivalent and above) by any one of the nationally recognized statistical rating organizations. FMR normally intends to enter into wrap contracts with multiple parties, but may have a single wrap issuer for all of the Stable Value Portfolio's underlying assets. FMR may terminate and replace wrap contracts under various circumstances, including when there is a default by the wrap issuer.

FMR purchases wrap contracts for the Stable Value Portfolio with the aim of maintaining the contract value of the Stable Value Portfolio's underlying assets, as contract value is the amount that the participants transact at. FMR invests the Stable Value Portfolio's assets consistent with the terms of the wrap contracts. As a target, FMR expects a substantial percentage (up to 99%) of the Stable Value Portfolio's assets to be underlying the wrap contracts, although FMR may change this target from time to time based on factors, such as the availability of capacity under the Stable Value Portfolio's wrap contracts or the availability of wrap contract capacity generally within the market for such instruments. Assets not underlying the wrap contracts will generally be invested in money market instruments and cash equivalents to help the Stable Value Portfolio maintain a stable NAV and to provide necessary liquidity for unitholder withdrawals and exchanges.

Wrap contracts accrue interest using a formula called the "crediting rate." Wrap contracts use the crediting rate formula to convert market value changes in the underlying assets into income distributions in order to minimize the difference between the market and contract value of the underlying assets over time. Using the crediting rate formula, an estimated future market value is calculated by compounding a portfolio's current market value at such portfolio's current yield to maturity for a period equal to such portfolio's duration. The crediting rate is the discount rate that equates that estimated future market value with such portfolio's current contract value.

Crediting rates are reset monthly. The wrap contracts provide a guarantee that the crediting rate will not fall below 0%. The crediting rate, and hence a portfolio's return, may be affected by many factors, including purchases and redemptions by unitholders. The impact depends on whether the market value of the underlying assets is higher or lower than the contract value of those assets. If the market value of underlying assets is higher than their contract value, the crediting rate will ordinarily be higher than the yield of the underlying assets. Under these circumstances, cash from new investors will tend to lower the crediting rate and a portfolio's return, and redemptions by existing unitholders will tend to increase the crediting rate and a portfolio's return.

If the market value of underlying assets is lower than their contract value, the crediting rate will ordinarily be lower than the yield of the underlying assets. When the market value is lower than the contract value, a portfolio will have, for example, less than \$10.00 in cash and bonds for every \$10.00 in net assets available for benefits. Under these circumstances, cash from new investors will tend to increase the market value attributed to the underlying assets and to increase the crediting rate and a portfolio's return. Redemptions by existing unitholders will have the opposite effect, and will tend to reduce the market value attributed to the underlying assets and to reduce the crediting rate and a portfolio's return. Generally, the market value of underlying assets will tend to be higher than contract value after interest rates have fallen due to higher bond prices. Conversely, the market value of underlying assets will tend to be lower than their contract value after interest rates have risen due to lower bond prices.

Notes to Financial Statements – continued

If a portfolio experiences significant redemptions when the market value is below the contract value, a portfolio's yield may be reduced significantly, to a level that is not competitive with other investment options. This may result in additional redemptions, which would tend to lower the crediting rate further. If redemptions continued, a portfolio's yield could be reduced to zero. If redemptions continued thereafter, a portfolio might have insufficient assets to meet redemption requests, at which point a portfolio would require payments from the wrap issuer to pay further unitholder redemptions.

The table below summarizes the type, fair value, the unrealized gains, unrealized losses and the change in net unrealized appreciation (depreciation) on the wrap contracts during the period, as presented in the Statement of Operations.

	Fair Value	Unrealized Gains	Unrealized Losses	Change in Net Unrealized Appreciation (Depreciation)
Wrap Contracts	\$10,641,427	\$10,641,427	\$ -	\$4,805,263

5. Other Information:

In the normal course of business, the Portfolios may enter into contracts that provide general indemnifications. The Portfolios' maximum exposure under these arrangements is unknown as this would be dependent on future claims that may be made against the Portfolios. The risk of material loss from such claims is considered remote.

The Portfolios do not invest in the Underlying Funds for the purpose of exercising management or control; however, investments by the Portfolios within their principal investment strategies may represent a significant portion of an Underlying Fund's net assets. At the end of the period, UNIQUE Stable Value Portfolio was the owner of record of 48% of the total outstanding shares of Fidelity Education Income Fund and UNIQUE College Portfolio (Fidelity Funds) was the owner of record of 15% of the total outstanding shares of Fidelity Series Short-Term Credit Fund.

As of September 30, 2023, the Portfolios, in aggregate, owned 20% of the outstanding shares of the following Underlying Funds:

Underlying Fund	% of shares held
Fidelity Series 0-5 Year Inflation-Protected Bond Index Fund	26%
Fidelity Series Short-Term Credit Fund	30%
Fidelity Series Treasury Bill Index Fund	31%

6. Risk and Uncertainties:

Many factors affect a portfolio's performance. Developments that disrupt global economies and financial markets, such as pandemics, epidemics, outbreaks of infectious diseases, war, terrorism, and environmental disasters, may significantly affect a portfolio's investment performance. The effects of these developments to a portfolio will be impacted by the types of securities in which a portfolio invests, the financial condition, industry, economic sector, and geographic location of an issuer, and a portfolio's level of investment in the securities of that issuer.

Wrap Contract Risk. The Stable Value Portfolio is unlikely to maintain a stable NAV if, for any reason, it cannot obtain or maintain wrap contracts covering its underlying assets that are not otherwise invested in stable NAV money market funds. This could result, for example, from the Stable Value Portfolio's inability to promptly find a replacement wrap contract following termination of a wrap contract. FMR will attempt to assess the credit quality of wrap issuers, but there is no guarantee as to the financial condition of a wrap issuer. The issuer's ability to meet its contractual obligations under the wrap contracts may be effected by future economic and regulatory developments. Wrap contracts are non-transferable and have no trading market. There are a limited number of wrap issuers and, with respect to those wrap issuers, a limited amount of wrap capacity. The Stable Value Portfolio may lose the benefit of wrap contracts on any portion of its assets in default in excess of a certain percentage of portfolio assets. In the event that wrap contracts fail to perform as intended, the Stable Value Portfolio's NAV may decline if the market value of its assets declines.

Report of Independent Auditors

To the Fiscal Committee of the General Court of the State of New Hampshire and the Trustee of the New Hampshire Higher Education Savings Plan Trust

Opinions

We have audited the accompanying financial statements of each of the Portfolios listed in the table below (constituting New Hampshire Higher Education Savings Plan Trust, hereafter collectively referred to as the "Portfolios"), which comprise the statement of assets and liabilities, including the schedules of investments for the portfolios listed in the table below, as of September 30, 2023, the related statements of operations and of changes in net assets, including the related notes, and the financial highlights for each of the periods indicated in the table below (hereafter collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of each of the Portfolios listed in the table below as of September 30, 2023, and the results of each of their operations, the changes in each of their net assets, and each of their financial highlights for the periods indicated in the table below in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (US GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Portfolios and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Portfolios' ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with US GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Portfolios' internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Portfolios' ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Information

Management is responsible for the other information included in the annual report. The other information comprises Performance: The Bottom Line, and Management's Discussion of Fund Performance, but does not include the financial statements and our auditor's reports thereon. Our opinion on the financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.
