

SECURE Act 2.0

Bipartisan legislation that would expand access to retirement accounts and increase retirement savings.

On May 5, 2021, the U.S. House Ways and Means Committee unanimously advanced the Securing a Strong Retirement Act of 2021. Later in May, the Retirement Security & Savings Act was introduced in the Senate, bipartisan retirement legislation that closely aligns with the House bill. The bills, commonly referred to as the **SECURE Act 2.0**, include **commonsense reforms that would improve Americans' retirement security**.

Of particular importance, the legislation would help millions of employees burdened with student debt, by allowing employers to make a **matching contribution to the employee's retirement plan** in the amount the employee is paying towards their student loans.

FIDELITY INSIGHT

Fidelity's research shows that many workers with student debt are **delaying contributing to their retirement account**.

79% of borrowers say student loans **impact their ability to save for retirement**¹

35% of Fidelity Student Debt Tool users report contributing only **between 0-5% of their salary to their 401(k)**²

This change would ensure that employees would not be forced to **choose between paying off student loans and saving for retirement**.

Other important provisions in SECURE 2.0 include:

Raising the **RMD Age to 75**, which would allow Americans to continue to build their retirement savings

Eliminating unnecessary plan disclosures to un-enrolled participants

Allowing 403(b) plans to be maintained as a **multiple employer plan (MEP)** or **pooled employer plan (PEP)**

Allowing participants to self-certify that they have had an event that constitutes a deemed hardship for purposes of **taking a hardship withdrawal from a 401(k) plan or a 403(b) plan**

Fidelity urges Congress to pass the SECURE Act 2.0
