- Age-Based Portfolios (Fidelity Funds)** are designed to generate returns that attempt to beat a major market index over the long term. These portfolios invest solely in Fidelity funds that are managed by dedicated portfolio managers who are making investment decisions backed by Fidelity’s proprietary investment research
- Age-Based Portfolios (Fidelity Index)** are designed to generate returns that closely mirror the performance of a major index over the long term. These portfolios invest solely in Fidelity Index funds, and are able to keep transaction costs and other expenses low because they are passively managed. This means that the securities currently held in the respective index determine your investments.
- Age-Based Portfolios (Multi-Firm)**, like our Fidelity Fund Portfolios, are designed to generate returns that attempt to beat a major market index over the long term and are managed by dedicated portfolio managers at Fidelity. These provide an opportunity to diversify your funds across multiple fund companies.
