An easier way to view New Issue Muni offerings

1 We've separated the parent page into distinct 3 distinct sections, enabling you to quickly and easily view what you want to see.

- Open**- Order period has commenced
- Expected**- Order period will commence soon
- Closed**- Order period is no longer open

Additional Repricing information now available

2 Easily identify which recently closed offerings were repriced. If you placed an order for a repriced offering, click **View Repriced Offerings** to learn the most recent price and yield details.

Easily place a trade

3 The **Participate** link is more prominently displayed, now appearing as a button, allowing you to place an order for a new issue municipal bond offering.

In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Any fixed income security sold or redeemed prior to maturity may be subject to loss.

The municipal market can be adversely affected by tax, legislative, or political changes and the financial condition of the issuers of municipal securities. Investing in municipal bonds for the purpose of generating tax-exempt income may not be appropriate for investors in all tax brackets or for all account types. Tax laws are subject to change and the preferential tax treatment of municipal bond interest income may be revoked or phased out for investors at certain income levels. You should consult your tax adviser regarding your specific situation.
