

Fidelity Digital AssetsSM

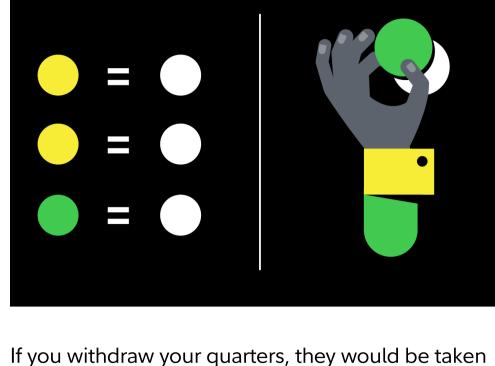

Fidelity CryptoSM is offered by Fidelity Digital AssetsSM which prioritizes both security and accessibility by using an **omnibus storage** structure. Traditional capital markets, like stocks and bonds, as well as many other digital asset custodians use a similar structure.

What is an omnibus structure?

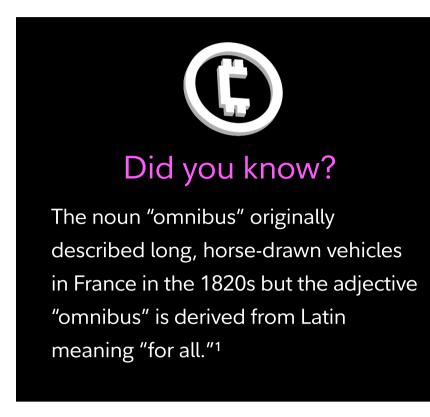

Simply put, an omnibus structure means all client assets are stored together but recorded individually. An omnibus structure allows Fidelity Digital Assets to pull assets from a single source vs. multiple accounts. For example, let's use quarters to represent bitcoin. The idea of an omnibus structure is to have a communal jar of quarters vs. a separate jar for each person.

Say you buy 2 quarters, then someone buys 1, and someone else buys 3. All 6 quarters would be placed in the same jar, but your account would only show your 2 quarters.

from the jar with 6 quarters. When you receive your quarters, they might not be the same exact 2 quarters you put in the jar—but they hold the same value—aka a fungible asset.

How does Fidelity Digital Assets use an omnibus structure?

Fidelity Digital Assets combines both hot and cold storage to provide an optimized balance of security and accessibility.

wallets making them easily accessible for trades and transfers.

storage.

How does Fidelity Digital Assets keep crypto safe?

Your assets are held offline in cold storage in a hardened room structure that's TEMPEST shielded

and radio frequency blocked.

Blockchains are public, which means transactions can be seen by all users in real time. With our omnibus structure, your personal holdings and

On-chain privacy

transactions are kept off-chain to help ensure privacy.

All facilities and systems are fully redundant with backups in case any site becomes unavailable due to

unforeseen circumstances, like a natural disaster. All sites also have 24/7 alarms, security, and remote monitoring.

measure is a multistep process at multiple locations.

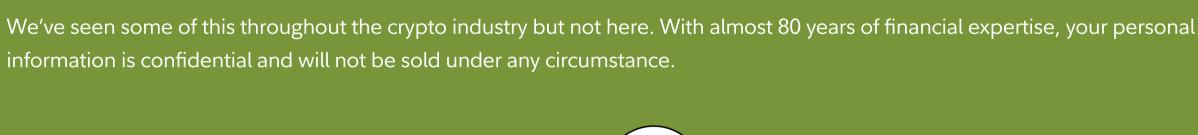

Rehypothecate means lending out an asset on behalf of a client and potentially lending that asset more than once. This can be risky if

everyone wants their assets at the same time, so we don't and have no intention to.

Fidelity Digital Assets using all the safety and security measures previously outlined.

Digital assets are not rehypothecated

We do not sell client data

No third-party custodians

Everything is done in house, which is not true for all crypto custodians or exchanges. Any BTC or ETH you may purchase is stored by

The bottom line

With Fidelity Crypto, we prioritize the safety and security of your assets and personal information. We also prioritize crypto education, giving you resources and tools to grow your crypto confidence.
