Customize your Charting Experience

Charting in ATP

Overview

Charting can be a decisive tool for evaluating investment opportunities

- Evaluate historical and intra-day price movements
- Understand trading ranges and patterns
- Determine possible entry and exit points

Customize your Chart Display

Time periods

Use to view price and volume for a security from today up to more than 30 years ago, coupled with a range of frequencies

Saving the chart

Name the chart and select which settings, indicators, events and/or timeframes saved with the template; you may make this chart your default view

Work Efficiently with Chart Features

Tips and Tricks

- Use the link tool to allow data in one tool to automatically update the other
- Create up to 10 different tabbed views within a single chart for a symbol
- Be sure to save your chart
- Use the Indicator menu to add, modify, or delete an indicator

Work Efficiently with Chart Features

Tips and Tricks

- Select a pre-defined time period from today up to 30 years, or enter a custom time period
- Right-click on a Chart to access a variety of options including: Style, Setting, and quick links to place a trade

Take Advantage of Technical Analysis

Recognia's Chart Pattern Recognition

Overview

- Navigate to the Technical Analysis tab and select Patterns and Events
- Gain access to expert chart pattern recognition, automated by Recognia
- Recognia is an asset to anyone just beginning to learn technical analysis

Understand Real-Time Analytics

About Real-Time Analytics

Overview

- Real-time Analytics automatically scans your positions, watch list, and index
- It sends alert signals when technical events and patterns are met in real-time
- Navigate to the Alerts menu and select Real-time Analytics

Real-Time Analytics Features

- Multiple ways to filter by signal, Nasdaq, S&P, watchlist, positions in account, or even individual symbols
- When the bullseye icon turns blue, there is an active signal
- Expand each signal for description along with links to quote, chart, and trade ticket
- Chart will prefill with signal that was triggered
- Signals available from 9:30AM to 4:00PM ET

Disclosures

Any screenshots, charts, or company trading symbols mentioned, are provided for illustrative purposes only and should not be considered an offer to sell, a solicitation of an offer to buy, or a recommendation for the security.

System availability and response times may be subject to market conditions.

Investing involves risk, including risk of loss.

Real-time analytics uses historical information to generate alerts about potential opportunities. It should be used in conjunction with your own research and should not be the sole basis on which to make investment decisions. Past performance is no guarantee of future results.

Technical analysis focuses on market action – specifically, volume and price. Technical analysis is only one approach to analyzing stocks. When considering what stocks to buy or sell, you should use the approach that you're most comfortable with. As with all your investments, you must make your own determination whether an investment in any particular security or securities is right for you based on your investment objectives, risk tolerance, and financial situation. Past performance is no guarantee of future results.
