*S&P 500 Index Fact Sheet, April 30, 2018.

Tax-sensitive investment management techniques are applied in managing taxable accounts (including “tax-loss harvesting”) on a limited basis, at the discretion of Strategic Advisers primarily with respect to determining when assets in a client’s account should be bought or sold. As a discretionary portfolio manager, Strategic Advisers may elect to sell assets in an account at any time. A client may have a gain or loss when assets are sold. Strategic Advisers does not currently invest in tax-deferred products, such as variable insurance products, or in tax-managed funds, but may do so in the future if it deems such to be appropriate for a client. Strategic Advisers does not actively manage for alternative minimum taxes; state or local taxes; foreign taxes on non-U.S. investments; or estate, gift, or generation-skipping transfer taxes. Strategic Advisers relies on information provided by clients in an effort to provide tax-sensitive investment management, and does not offer tax advice. There are no guarantees as to the effectiveness of the tax-sensitive management techniques applied in serving to reduce or minimize a client’s overall tax liabilities, or as to the tax results that may be generated by a given transaction. Except where FPTC is serving as trustee, clients are responsible for all tax liabilities arising from transactions in their accounts, for the adequacy and accuracy of any positions taken on tax returns, for the actual filing of tax returns, and for the remittance of tax payments to taxing authorities.

Assets under management include only managed account assets.

HOW WE MANAGE YOUR ACCOUNT FOR TAXES
Your account will be managed in an effort to boost your after-tax returns throughout the year — not just at year-end. Your account is evaluated each business day and uses one or a combination of the following techniques to seek enhanced after-tax returns.5

FOUR TAX STRATEGIES

1. Portfolio Harvest
   - Tax losses
   - Offset gains to save on taxes over time

2. Transition your existing holdings
   - Defer realizing short-term gains
   - Avoid realizing short-term gains, which are taxed at a higher rate, when possible

3. Manage tax lots
   - Select advantageous lots to sell and build a tax-efficient portfolio of lots

4. Build your portfolio around holdings you used to fund your account

5. Please ask a Fidelity representative for the Fidelity Strategic Disciplines Program Fundamentals for more information about the techniques highlighted.
